Reviewer's report

Title: Echocardiographic evidence of left ventricular untwisting-filling interplay

Version: 1 Date: 05 Feb 2020

Reviewer: Miroslaw Kowalski

Reviewer's report:

The article encompasses an important issue of diastolic LV function. Despite many approaches in echocardiography and wide array of indices, there is still difficulty in definition of what we measure and what is the current status of twisting-filling interplay. The paper submitted clarifies these issues. Diastolic intraventricular pressure gradient (DIVPG) though uneasy to follow in terms of mathematical concept can be introduced to clinical practice with the use of dedicated software. Having read the manuscript in the revised version I am convinced that the paper contributes to understanding of diastolic phenomenon and merits publication.
