Reviewer’s report

Title: Factors influencing trainee doctor emigration in a high income country: A mixed methods study

Version: 0 Date: 30 Jun 2017

Reviewer: Norbert Dreesch

Reviewer's report:

1. Content

A welcome article adding to the growing body of knowledge on migration. It is of particular interest using a mixed quantitative and qualitative interview technique. This always gives the reader the opportunity to appreciate the quantitative findings with a few key quotes that illustrate the findings in impressive ways. It is hoped that some of the identified elements of discontent in the training situation get further researched to understand the reasons of trainer attitudes towards their trainees so that interventions can be designed to reduce these factors which contribute to generating losses from the future workforce.

2. Editorial

A few typing errors, etc. need to be addressed:

Page 4: line 9: move the citation in front of the comma

Page 18, line 16: add a comma after "However"

Page 19, line 48: add a full stop after the word "perceived"

Page 22, line 58: spell out the abbreviation "ED" in a footnote

Page 23/24, list abbreviations: order alphabetically

Page 24, lines 38 to 49: review punctuation at the end of sentences, full stops missing.

Page 26, line 7: correct the word "Worlds" to read "World"

Add access dates to references 20, 26, 37-40 and 45-47
