1. Author may give details about the piloting and validation process i.e. sample size, observation and changes in instrument after piloting etc.

2. Operational definition of Being safe, feeling safe and stigmatizing attitude can be given for more clarity.

3. Name of author (line 82) is not require to mention in data collection section.

4. Is there any methodological limitation of study according to author? If yes that should be mention in the limitation section.
