Reviewer's report

Title: Transforming Tuberculosis (TB) service delivery model in China: Issues and challenges for health workforce

Version: 0 Date: 11 Jun 2019

Reviewer: Min Yu

Reviewer's report:

The manuscript is interesting, which supported by the questionnaire survey and focus group discussion. However, to make it to be published, it needs revised.

1. On line 189-191 of results part, the OLS regression results should be described in this paper, and the sentence should be moved to the "Data process and analysis" part.

2. On line 242 of "Income level and motivation policies" part, "compare to the previous year", what's the exact years? The duration of the years should be described.

4. Table 1 shows the data in 2015, I think 2015 is too long from now, it can't reflect the current situation.

5. More sampling details of the questionnaire respondents should be described because the level of hospitals can also have an impact on scores. It's not convincing to say "Doctors in Jilin and Ningxia had significant lower performance in the exam than those in Zhejiang" only by statistical results.

Level of interest

Please indicate how interesting you found the manuscript:
