Title: Reforming Medical Education Admission & Training in Low- and Middle-Income Countries: Who Gets Admitted and Why it Matters

Version: 1 Date: 20 Oct 2019

Reviewer: Andreasta Meliala

Reviewer's report:

The readers would like to know more about the link between "production' and "utilization" of health care providers. How's the mechanism of utilization side to maintain the positive work moral of the providers? If the production side has made a progress (e.g creating positive attitude), but the utilization side has not, then it would be blurring the result of the production side. In real life setting, the measurement of motivation is done in practical level, rather than in the school or in pre service phase. This issue should be taken into account in the recommendation and be written in more explicit way.

We can refer to "labour market" concept.
