Title: Patient Satisfaction with Physician Assistant/Associate Care: An International Scoping Review

Version: 1 Date: 01 Aug 2019

Reviewer: Jim Parle

Reviewer's report:

This is an important topic and a valuable contribution to the literature. However I found a number of minor issues, and 1 or 2 more substantial ones. The biggest issues being the lack of clarity (for me at least) as to which studies, if any, were pre-contact with a PA and which post, which asked just about satisfaction with the PA and which compared satisfaction with a PA versus with an MD, and the decision to exclude non-english articles.

I was also not convinced of the conclusions, as I could not see how the conclusion that satisfaction was equal to that with drs was justified since many of the papers appeared (to me at least) not to include such a comparison. this needs elucidating

If these issues are addressed I THINK IT IS VERY PUBLISHABLE
