Reviewer's report:

Dear authors,

Thank you so much for your submission to the Human Resources for Health. Please find my comments below to improve your manuscript.

1. Too many abbreviations in this Manuscript.
2. Please clearly identify the meaning that you conducted your research. What are the research gaps and development in your selected topic nowadays? Has it ever closed any research gaps in this study field? Any call for a similar qualitative study like yours?
3. How was your sampling in your mixed-method research? Have you ever considered whether this sample is representative? Any evidence to support it? If not representative, how did you handle this problem in your study?
4. How did you organize your interview and text analysis in this study? Any criteria? Is it possible to draw one picture for your steps of this study?
5. How did you make sure the size of your sample enough for this study? Have you ever calculate your sample size? How? Why did you calculate it in this way?
6. Have you ever considered a control group in this study? Why?
7. When conducting your pre-test, how did you control the confounders and biases in your study?
8. How did you design your questionnaire? Have you ever conducted a pilot study before your pre-test and post-test? Why?

Based on these comments above, I have to ask you to resubmit your manuscript for reconsideration. Good luck!
