Title: Using hospital auxiliary workers and 24-hour TB services as potential tools to overcome in-hospital TB delays: a quasi-experimental study

Version: 0 Date: 27 Nov 2019

Reviewer: Mary Nyikuri

Reviewer's report:

You have done a good study but how you present it is flawed. I struggled to follow as there many long sentences, lots of repetition, and grammar issues. There is a lot of missing information on for example the beliefs of the local people and how these can influence people's treatment adherence. I have made edits within the document for you to see specific examples of what I mean.
