Title: Strengthening and measuring research impact in global health: lessons from applying the FAIT framework

Version: 0 Date: 01 Mar 2019

Reviewer: Sheila Turner

Reviewer's report:

I thought this was a very interesting and well written article. The area that I felt needed some discussion was the role of infrastructure in LMICs. This is likely to affect impact of any health research and the infrastructure in LMICs is very different to HICs where the tools used have been developed. While this was touched on by implication, I thought this was one piece of the picture that need to be expanded upon.

For the interest of the authors I have copied a link to the NIHR Global Health programme which they may not be aware of: https://www.nihr.ac.uk/funding-and-support/global-health-research/
