Reviewer’s report

Title: Improving the validity, relevance and feasibility of the continuum of care framework for maternal health in South Africa: a thematic analysis of experts’ perspectives

Version: 1 Date: 21 Jan 2020

Reviewer: Theresa Diaz

Reviewer's report:

I feel you have addressed my concerns especially making clear the focus what on existing indicators and providing more details on the source of those indicators. Would have been nice to use the opportunity to include some globally recognized indicators that are not part of the South African available indicators, to also include thoughts and suggestions on those indicators and what may be missing in the South African context. For example it is important to assess number of ANC visits and this is a globally acceptable indicator, I am surprised this was not collected in South Africa but something to consider should you conduct any future research in this area.

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English
Please indicate the quality of language in the manuscript:
