Reviewer's report

Title: Epidemiology of dyslipidemia in chinese adults: meta-analyses of the prevalence, awareness, treatment and control

Version: 2 Date: 5 August 2014

Reviewer: Gregory Roth

Reviewer's report:

This manuscript addresses my original comments.

Major Compulsory Revisions: None

Minor Essential Revisions: None

Discretionary Revisions: hypertriglyceridemia is the most common term for high triglyceride levels, not hyperglyceridemia

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
