Reviewer’s report

Title: A Comparative Analysis of Disability Measures in Cameroonian Surveys

Version: 0 Date: 02 Jul 2019

Reviewer: Rosalba Rojas-Martinez

Reviewer's report:

The main objective of the authors of the document is to evaluate the comparability of different measures of disability used in Cameroon. For which they use different definitions that compare by a "gold standard". However, this cannot be done using a different definition in different surveys or census, so it is not possible to obtain the parameter of interest. The stated objective could be obtained if the different definitions are applied to a single survey or census, only in this way can comparability be achieved. The objective of this document is, in fact, to evaluate the association between sociodemographic characteristics and disability measures, as mentioned in lines 32 to 34 on page 6.
