Title: Effect of Female genital cutting/mutilation; Types I and II on sexual function: case-controlled study

Version: 1 Date: 12 Mar 2017

Reviewer: Manal Ibrahim Hanafi Mahmoud

Reviewer's report:

Thank you for selection of that important topic that affects women life.

You should stated that you include only women who knows to read and write as you obtained written consent from all. Non inclusion of illiterate women may be form a bias as high percent of women in Upper Egypt are illiterate.

I think that inclusion of type III and IV; in comparison with type I and II will enrich your study (as I know that type 3 is common in upper Egypt).

In result section, table 3 why you did not use post Hoc test with One Way Anova and just comment on findings of post Hoc??

In discussion section please remove all paragraphs that correlate between this act and Islam. (page 8, 9 and 12)
