Reviewer’s report

Title: Is a woman's first pregnancy outcome related to her years of schooling? An assessment of women's adolescent pregnancy outcomes and subsequent educational attainment in Ghana

Version: 1 Date: 11 Dec 2016

Reviewer: Sarah Borg

Reviewer's report:

Just some minor comments/corrections:

- "Young girls are more prone to the use of unsafe abortion methods"
  No reference for this statement is provided

- It might be worth explaining in the Methods section why you combined the responses of women who had miscarriages and stillbirths

- Grammatical error in line 264: "It is highly likely that some of the younger one's may still be in school." Should say "ones" instead of "one's"

- Sentence on lines 310-11 "As the number of abortions increased, the proportion of women reduced drastically." Is unclear. The proportion of women doing what decreased?

- Sentence 313-14 is also unclear "The characteristics of the ever been pregnant only women were very similar to all women." Is this saying that the women who had been pregnant have similar characteristics to all the women who had never been pregnant?
