Title: Muslim Women's Use of Contraception in the United States

Version: 1 Date: 12 Oct 2017

Reviewer's report:

Minor comments or revisions:

1) Abstract

Correct the sampling method (convenience instead of snowball).

3) Methods

   a) Study design and participants. The authors explain that all participants answer to questions in the same order, but that still does not clarify what the order is, and why they consider it "standard". They might further explain or remove the reference to a "standard order".

   b) Outcome measures. The authors should explicitly refer to all references used to make the questionnaire (including authors and years).

   c) Statistical analyses. I believe the Authors meant "Frequencies" instead of "Univariate statistics".
