Reviewer’s report

Title: Contraceptive use and pregnancy rates among women receiving antiretroviral therapy in Malawi: A retrospective observation cohort study

Version: 0 Date: 28 Jul 2017

Reviewer: Wellington Martins

Reviewer's report:

The results were predictable (offering effective contraceptives reduce pregnancy rates) and the generalizability of the findings is limited. However, the study is very well-written - authors acknowledge most of the limitations - and the results are still interesting.

I have only one minor comment

- Please, define ART in the abstract.
