Title: Quality of care during childbirth in Tanzania: identification of areas that need improvement

Version: 0 Date: 11 Dec 2017

Reviewer: Fereshteh Behmanesh

Reviewer’s report:

My comments:

1. Please insert a form of pantograph related to the sampling centers.

2. The information in setting part is related to the introduction.

3. In methodology you should not bring reference.

4. Find better and shorter words for theme. These sentences are not suitable:

   1) Women move between different rooms during childbirth which influences the care they receive. Few women were monitored during their first stage of labour.

   2) Assumptions and hope for good outcomes reduce health worker motivation for routine monitoring.
