**Reviewer’s report**

**Title:** Implementation project of Non-Pneumatic Anti Shock Garment and m-communication to enhance maternal health care in rural Tanzania

**Version:** 0  **Date:** 20 Sep 2018

**Reviewer:** Jose Belizan

**Reviewer’s report:**

It is a relevant project involving a great effort of the team on the implementation of a complex intervention aiming at saving maternal lives.

I have only one major comment. My suggestion is to delete all the considerations and mentions about results regarding maternal mortality. This manuscript is dealing with the evaluation of the process of implementing the NASG. The assessment of changes on maternal mortality would need a different analytic approach that is beyond the focus of this manuscript. Please delete first sentence of the Discussion section.

Minor comments.

Please check if the link in page 11, line 54 is adequately working.

Please do not use an acronym -NASG- in the title.

Please place tables and figures at the end of the text each one in a separate page.
