Reviewer’s report

Title: Can community health workers increase modern contraceptive use among young married women? A cross-sectional study in rural Niger

Version: 1 Date: 17 Jan 2019

Reviewer: Rubee Dev

Reviewer's report:

Thank you so much for responding to the suggested changes and updating the manuscript. Great work!!

It will be good, if you could further refine the discussion section. There are still some repetitions of results in the discussion that could be avoided. The first paragraph should only highlight the main findings of the study, followed by paragraphs that discusses the justification of those findings by making comparison with other studies. You could avoid redundancy in presenting estimates of the findings under the discussion section.

Also, why do we need a clinical trial registration number for a cross-sectional study?
