Title: Determinants of risky sexual practice, Drug Abuse and Alcohol Consumption in Adolescents in Iran: A Narrative Systematic Literature Review Reproductive Health

Thank you very much for the opportunity to review this manuscript. Please consider the following concerns:

1) Line 37-38, please elaborate on the association of these behaviors in text and explain why these behaviors were examined together. Please also explain whether the identified factors in this review apply to all these behaviors.

2) Line 105-108: Please elaborate on how and why the results of interventions are inconsistent. Please add references as well.

3) Line 133: Please elaborate on why only adolescents between the ages of 15 to 19 are selected.

4) In the abstract, the authors indicated that 5 main theme and 40 sub-themes were identified. However, these results were not reported in the results section.

5) Since the results and discussion were not separate, it was difficult for the reader to distinguish which were the results of this literature review.

6) The authors have identified various factors affecting the behaviors, however, it was unclear why the authors concluded that family can reduce the negative effects of the identified areas.
