Reviewer’s report

Title: Assessing the impact of an educational intervention program on sexual abstinence based on the Health Belief Model amongst adolescent girls in Northern Ghana. A Cluster Randomized Trial.

Version: 0 Date: 20 Apr 2019

Reviewer's report:

A good study in the Field of interest. I recommend that the study method be reviewed taking into cognizance/linking the final outcome/result with the intervention introduced to the study group (Intervention group). Since there were significant changes both among the Control and Study Groups and that school is not the only source for CSE (i.e other sources include communities, home, radio, peer clubs, etc.), the study needs to established whether the result achieved among the study group was as a result of the intervention (exposure/introduction to CSE in the school).
