Reviewer’s report

Title: Pilot randomized trial of short-term changes in inflammation and lipid levels during and after aspirin and pravastatin therapy

Version: 1 Date: 15 Aug 2019

Reviewer: C. Matthew Peterson

Reviewer's report:

The revisions made are clarifying. The data will be helpful to investigators selecting dosage levels in similar study populations.

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English
Please indicate the quality of language in the manuscript:

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
I am funded as a PI in the NICHD's "Low-cost intervention to augment first-line infertility treatment success: a randomized clinical trial in women with inflammation". I am biased towards finding effective treatments for inflammation in order to improve reproductive performance.
