Reviewer’s report

Title: Socio-cultural contextual factors that contribute to the uptake of a mobile health intervention to enhance maternal health care in rural Senegal

Version: 0 Date: 09 Apr 2019

Reviewer: Claudia Hanson

Reviewer's report:

This is an interesting and well written article which gives interesting insides.

My main recommendation relates to the method section where I miss a few information: why so many interviews? Was there any framework used to guide the development of the interviews? How was quality ensured? What was the education/training of those who did the interviews? What method of analysis was used?

I think the limitations of the study should go to the discussion.
