Reviewer's report:

Dear authors

I appreciate your effort to revise the manuscript.

This revision looks much better than previous version. However, I find that English must fix in the manuscript.

There are some other errors I noticed.

* Reference citation is missing randomly for instance in line 76 - 78. Therefore, I would suggest authors carefully check the manuscript and references must cite where they stated evidence.

* Lines 126 -127 (With the help …) would be best to place after the lines 136 -137 (From the first…).

* In the line 148, 'diagnose' must replace with 'screen'.

* 0.1 percent is missing in the percentage distribution of education status in table 1.

* One (1) is missing in the frequency distribution of "History of emotional or physical abuse" in table 3.

* One (1) is excess in the frequency distribution of "Ever drank alcohol beverage" in table 4.

* 0.1 percent is missing in the percentage distribution of "How often drank alcohol beverage" in table 4.

* I do not think the confidence interval of the prevalence of CMD is correct that authors provided. Please check this and also provide decimal after dots for instance 35.8.
