Title: Measuring fidelity, feasibility, costs: an implementation evaluation of a cluster-controlled trial of group antenatal care in rural Nepal

Version: 0 Date: 18 May 2019

Reviewer: Ayse Akin

Reviewer's report:

Dear Author(s),

I would like to congratulate all the researchers involved in this study for selecting research topic which is very important for maternal and child health.

To my knowledge Nepal is a country with difficult socio environmental and economic difficulties as well as geographical conditions. As you also stated in your manuscript despite to some recent reduction in maternal mortality ratio still is quite high. Therefore the pilot testing an innovative approach for ANC is not only of importance for Nepal but also in many countries with similar problems might be a guiding model to improve perinatal health for both mothers and children.

At that point I would suggest to highlight your methodology details further in your second paper which you mentioned to be submitted concurrently with detailed statistical analysis.

All The Best in your carriers....
