Reviewer's report

Title: Effect Of Submucosal Application of Tramadol on Postoperative Pain After Third Molar Surgery

Version: 2 Date: 13 May 2015

Reviewer: Fábio P Costa

Reviewer's report:

Major Compulsory Revisions:
1) Materials & Methods:
   - Why was it not done a split-mouth study?
   - How it was carried out the sample calculation? This information should be added into the text.
   - The authors could add more information regarding radiographic third molar position.
   - Sublingual application was made? The route of administration is not clear in the text methodology.

2) Results:
   - A flowchart with the study design and main results can be suitable to the journal readers.
   - Pain peak is not currently described in the text

3) Discussion:
   - Comparison of the present pain peak values with different studies is adequate to the Discussion section

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
