Reviewer’s report

Title: Single tooth torque correction in the lower frontal area by a completely customized lingual appliance

Version: 1 Date: 05 Jul 2017

Reviewer: Nikolaos Gkantidis

Reviewer's report:

This is a very interesting clinical report that has been considerably improved after the revision. However, there are a few more revisions that will further improve the present report. Please find my detailed comments below:

1. In Background the following has been added: "The force of the results of this study is of course strong limited due to the small amount of only three patients. But this pilot study shows that the digital superposition is a very well feasible method to analyze the planned and reached tooth position done by a partial appliance."

This whole part should be removed. This case series does not test the validity, accuracy, precision, or even reproducibility of the superimposition technique. Thus, one cannot suggest the method as "novel" because he simply tried to implement it and created some "nice" images. For this reason, I would remove this text and also the pilot study from the abstract and the test. A pilot study should be a pilot for a reason and should also be a study. With 3 patients this is definitely a case report/series.

2. Background line 9: "It was be demonstrated…” Please rephrase to "It was demonstrated…”

3. Page 5. Line 57 "…border“ should be "…border…”

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?
3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
