Reviewer’s report

Title: Granular cell tumors of the tongue: fibroma or schwannoma

Version: 0 Date: 03 Dec 2017

Reviewer: Y-H Taguchi

Reviewer's report:

The authors examined specimen in details and showed the enough information to be concluded that GNT developed from Schwann cell. Although the conclusion might be biased because of small number of samples, it is worth while publishing to be validated later by other researchers.

Level of interest
Please indicate how interesting you found the manuscript:

An article of limited interest

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
