Title: Quality of life and problems associated with obturators of patients with maxillectomies

Version: 0 Date: 02 Nov 2017

Reviewer: Luiz Felipe Palma

Reviewer's report:

An extremely interesting article regarding quality of life and problems associated with obturators of patients with maxillectomies. It is well conducted and of big clinical significance; however, some changes are needed.

Abstract: Some sentences could be grammatically improved and others are confusing, leading to a poor understanding of the manuscript's main idea.

Methods: Was there a sample size calculation? If so, how did the authors do that?

References: There are some problems regarding format.

Tables: The authors must add information on p-value, variables (e.g. years, months), and other important features. It is better not to use bold for significant p-values on tables.
