Reviewer’s report
Title: The Push-out Bond Strength of calcium silicate-based endodontic sealers

Version: 0 Date: 13 Mar 2018

Reviewer: Mariusz Lipski

Reviewer's report:
The paper is well written. The study itself is stringent, the results clearly stated limitations mentioned. The discussion includes an actual literature review on this issue.
I do not recommended any changes in language, however, I am not a native speaker (typo in Abstract: The root canals instead The Root canals)
Little corrections
Page 2, line 56 - Keywords - Complete with Endo CMP Sealer or remove BioRoot RCS and Total Fill BC Sealer
Page 6, line 4 - Was gutta-percha cone covered with root canal sealer?

Level of interest
Please indicate how interesting you found the manuscript:
An exceptional article

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?
5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
