Reviewer’s report

Title: Skeletal open bite with amelogenesis imperfecta treated with compression osteogenesis

Version: 0 Date: 13 Sep 2018

Reviewer: Günter Lauer

Reviewer's report:

The paper describes the Treatment Approach and the longterm result in a Patient who suffered from an open bite and amelogenesis imperfecta. The interesting part is that an interdisciplinary Approach of surgery orthodontics and prosthodontics has lead to a stable functionally and aesthetically appealing outcome.

Level of interest
Please indicate how interesting you found the manuscript:
