Reviewer's report

Title: Oral Symptoms and Oral Health-related Quality of Life of Individuals with X-linked Hypophosphatemia

Version: 0 Date: 13 Oct 2018

Reviewer: Nada Binmadi

Reviewer's report:

This is a questionnaire of oral health related quality of life in people with X-linked hypophosphatemia (XLH).

The authors need to be clear about rare disease they compare the study to it. Does it have oral symptoms? The reference they depend on is written in German.

The study design section is quite incomprehensible and does not mention the required sample size, and if the authors validate the developed questionnaire.

Why the author specifies ortho treatment? For example, Why endodontic therapy is not included in survey?

In the discussion, consider the limitations of the study and adjust the recommendations accordingly.

In discussion, How the XLH patients benefit from an early diagnosis compare to rare disease?

What star and circle indicate in fig 4

Identify the abbreviation in table

The quality of written English can be better. There are numerous grammatical issues.

Level of interest

Please indicate how interesting you found the manuscript:
