Reviewer’s report

Title: Mandibular growth in infants with Robin sequence treated with the Tübingen palatal plate

Version: 2 Date: 05 May 2019

Reviewer: Sergio Salerno

Reviewer's report:

The abstract was revised as suggested.

Double repetition of the table is now corrected.

A link to an open access journal for a visual impression of the palatal plate has been inserted.

Reference was updated as suggested (es: Butow's article, reference number 16).

Level of interest

Please indicate how interesting you found the manuscript:

An article of importance in its field

Declaration of competing interests

Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
