Title: TITLE: CHARGE SYNDROME: Genetic aspects and Dental Challenges, A Review and Case Presentation.

Version: 2 Date: 10 Mar 2020

Reviewer: Lisiane Bernardi

Reviewer's report:

The authors have answered all of questions. However, I would like to highlight only one point:

1) I still reinforce one suggestion that I have made before… Please, remove "at fours years" from the text and replace by "However, considering her general health conditions associated to her stage of development" she was unable to tolerate impression material in her mouth and it was decided that if deemed necessary, future dental management will be discussed with a multi-disciplinary dental team after eruption of her permanent teeth. Dental follow-up at 6 monthly intervals was arranged.
