Reviewer's report

Title: Measurement Error and Reliability of three available 3D Superimposition Methods in Growing Patients

Version: 0 Date: 13 Aug 2019

Reviewer: Christoph Runte

Reviewer's report:

Overall the article is interesting and of relevance. The study was well conducted within the limitations mentioned by the authors. Relevant literature is included. The abstract gives a concise description of the study.

It was, however, difficult to understand the underlying algorithms of the CmFreg/Slicer and dolphin method, which may be due to the manufacturer not disclosing details.

Statistical Analysis seems appropriate to us.

We would suggest perhaps to enhance the brightness/contrast of Fig. 8

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?
6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests.
