Reviewer’s report

Title: Measurement Error and Reliability of three available 3D Superimposition Methods in Growing Patients

Version: 1 Date: 04 Oct 2019

Reviewer: Anthony Markus

Reviewer's report:

The comments originally made have NOT been addressed. The two 'sentences' are:

Page 17 Line 4-11 (quite clear)

Known as problematic areas due to growth that occurs during childhood and adolescence at the spheno-occipital synchondrosis and the remodeling that occurs at the surfaces of the occipital and posterior sphenoid bones including the posterior wall of sella, which goes under resorption till late teens

This does not make sense

My second comment relates to what now appears on Page 18 Lines 25-29

The possible effect of the segmentation process and the different software programs used for the full superimposition as well as the landmark identification as a source of measurement error in 3D radiographic imaging

This has not been changed and does not make sense

Please deal with both these comments

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?
2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
