Reviewer’s report

**Title:** Evidence summaries (decision boxes) to prepare clinicians for shared decision making with patients: a mixed methods implementation study

**Version:** 2  **Date:** 2 September 2014

**Reviewer:** Lyndal Trevena

**Reviewer’s report:**

The authors have greatly improved the manuscript with these revisions. My only comment is that the paper is still very long and there could be some further consolidation of the qualitative results which, to some extent, are reiterated in the discussion section.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
