Reviewer's report

**Title:** Understanding effective care management implementation in primary care: A Macrocognition perspective analysis

**Version:** 3  **Date:** 9 July 2015

**Reviewer:** Jamie Brehaut

**Reviewer's report:**

This second submission of this work is a substantial improvement on the first. Initial reviews were addressed in detail, and have led to a much more readable and useful paper. Description of the approach in the introduction is much clearer. The discussion could stand with some more detail about the kinds of insights the macrocognitive approach elicited; the discussion makes the point that such insights were achieved, but citing a couple of examples for readers who may not have read the results in detail would be helpful. Overall, this is now a clearly publishable paper.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
