Reviewer's report:

Congratulations on writing an interesting article on the use of Twitter at the 2016 D&I Conference. The article is easy to follow and well structured.

It would be interesting to discuss whether this research (study) was planned prior to the conference and whether that had any influence on the promotion of the conference's hashtags by organisers?

Also, it is believed that Twitter drives people to share hashtags on Facebook, particularly, for professional reasons - who really want to be seen as informed in spreading news. While it could be challenging to track any such spread and understandably analysing any hashtags posted on Facebook, was out of scope of this study, did you actually consider expanding your analysis outside Twitter, if not, is it worth mentioning this in discussion section?

Well Done and Good Luck with the final version of the article.
