Reviewer’s report

Title: Can a multi-component multidisciplinary implementation package change physicians’ and nurses’ perceptions and practices regarding thrombolysis for acute ischemic stroke? An exploratory analysis of a cluster randomized trial

Version: 2 Date: 17 Sep 2019

Reviewer: Christine Cassidy

Reviewer's report:

Thank you for your detailed response to our comments. The authors briefly mentioned the BCW in lines 154 and 319-320. I would encourage them to expand on this thread - what was the utility of the BCW in this study? Why were these components selected? Any limitations to the framework? Tie the findings back to the framework to inform future implementation science work. I have no further suggestions.

Level of interest
Please indicate how interesting you found the manuscript:

An article whose findings are important to those with closely related research interests

Quality of written English
Please indicate the quality of language in the manuscript:
