Reviewer’s report

Title: A qualitative assessment of factors influencing implementation and sustainability of evidence-based tobacco use treatment in Vietnam health centers

Version: 0 Date: 05 Dec 2019

Reviewer: Hervé Tchala Vignon Zomahoun

Reviewer's report:

In this paper entitled "A qualitative assessment of factors influencing implementation effectiveness and sustainability of strategies for increasing tobacco use treatment in Vietnam health centers", authors presented findings from a post-implementation qualitative assessment of factors influencing implementation effectiveness and program sustainability. The topic addressed is very relevant for the implementation science and the study findings could be useful for the investigators of evidence-based intervention implementation. This qualitative study has been guided by the Consolidated Framework for Implementation Research, and reported according to the Standard for Reporting Qualitative Research. The methodology used seems rigorous and was reported with sufficient information. The study findings were also reported with sufficient details, and well discussed. My only comment to authors is to perform a language revision of their manuscript before its publication. Congratulations!

Level of interest
Please indicate how interesting you found the manuscript:
