Reviewer's report

**Title:** Relationship between bone density and bone metabolism in adolescent idiopathic scoliosis

**Version:** 1  **Date:** 5 March 2015

**Reviewer:** Emre Acaroglu

**Reviewer's report:**

This is a study on a specific bone resorption marker in patients with AIS. It provides new information and I do not see any problems with the methodology. I would only recommend minor grammatical revision as some sentences are fairly difficult to understand.

**Level of interest:** An article of importance in its field

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I do not have any conflicts of interest pertaining this study.
