Reviewer's report

Title: Risk factors for rod fracture after posterior correction of adult spinal deformity with osteotomy: a retrospective case-series

Version: 2 Date: 25 August 2015

Reviewer: Jean Dubousset

Reviewer's report:

accepted comments from the authors to my first recommendations but not solved because retrospective work and lack of theses informations. Effort made by the authors to add some comments on the discussion. Paper improved in the limits of the possibilities of the author; May be accepted for publication as a mean level of paper.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

no conflict of interest
