Reviewer’s report

Title: Analysis of Instrumentation Failures after Three Column Osteotomies of the Spine

Version: 1 Date: 04 Feb 2017

Reviewer: Douglas R. Orr

Reviewer's report:

Paper is acceptable for publication though I would still echo my earlier comment that the trend now is to stop using eponyms in all areas of surgery and go with the generic, in this case "posterior column osteotomy" Especially when your text description of Smith-Peterson is NOT what was described in 1945. This perpetuates an incorrect attribution.
