Reviewer’s report

Title: 3D Correction of AIS in Braces Designed Using CAD/CAM and FEM: a randomized controlled trial.

Version: 0 Date: 12 Oct 2016

Reviewer: Hani Mhaidli

Reviewer's report:

The limitations of the study are well stated, but it would be important to increase the number of patients to be included in the study, and most of all to see the midterm and long-term effect of the braces designed using CAD-CAM finite element simulation.

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field

Quality of written English
