Reviewer’s report

Title: An immediate effect of PNF specific mobilization on the angle of trunk rotation and the Trunk-Pelvis-Hip Angle range of motion in adolescent girls with double idiopathic scoliosis – a pilot study

Version: 2 Date: 28 Mar 2017

Reviewer: Fabio Zaina

Reviewer's report:

Table 2: it's not necessary to have both SD and SE, chose one of the two.

Table 4: still difficult for readers to understand. Again, I suggest the authors to calculate median or mean according to the way data are distributed and summarize your results. It seems the data are already presented in table 2....if this is the case I suggest to remove table 4

Discussion

It's better but probably still too long with respect to the limited findings of the paper.

Line 246-247: was the change before or after the treatment? Unclear....
