Reviewer’s report

Title: Appraisal of the DIERS Method for Calculating Postural Measurements: An Observational Study

Version: 1 Date: 22 Feb 2017

Reviewer: Toru Maruyama

Reviewer's report:

The revised manuscript was much better; however, there is one thing still I can't understand.

In conclusion section, "Because within-scan variability is not reported with the DRV, the clinical usefulness of DRV if reported by itself is limited."

As the authors described in the response, "the DRV is only 1 value for each measure", there exists no within-scan variability with the DRV.

I can't understand how to report the non-existed values.
