Reviewer’s report

Title: 2016 SOSORT Guidelines: Orthopaedic and Rehabilitation Treatment of Idiopathic Scoliosis During Growth

Version: 0 Date: 12 Oct 2017

Reviewer: Arnold Wong

Reviewer’s report:

I would like to commend the authors in preparing this outstanding comprehensive guideline with up to date information on the conservative treatment of idiopathic scoliosis. The guideline can facilitate the translation of knowledge from scientific research to clinical practice.

I have no major comment on this well-written guideline. However, I have a concern about the interpretation of Table 8 and 9. Would it be possible to add detailed legends for these two tables? Would it be possible to add a small paragraph in the text to help readers interpret or understand these two tables? What is the meaning of those numbers in the cells of Table 8 and 9? Do they indicate the number of studies or the number of votes?

Thank you for the great work.
