Reviewer’s report

Title: When and How to Discontinue Bracing Treatment in Adolescent Idiopathic Scoliosis. Results of a Survey.

Version: 0 Date: 22 Apr 2018

Reviewer: Tomasz Kotwicki

Reviewer’s report:

This study provides some interesting data on clinical practise of a group of orthopaedic surgeons coming from one country. Even with relatively low response rate (22%) the study is of value because the problem addressed - schedule for brace weaning after idiopathic scoliosis treatment - is relatively poorly described in the literature.

The weaknesses of the study are correctly listed.

The SOSORT Consensuses (2011 and 2016) about Indication for AIS treatment published in Scoliosis should be cited in the Background section to support the need for undertaking this survey.

No major revision to be made.
