Reviewer’s report

Title: Truncal Changes in Children with Mild Limb Length Inequality: A Surface Topography Study

Version: 0 Date: 28 Jun 2018

Reviewer: Masatoshi Teraguchi

Reviewer's report:

I would like to thank the authors for submitting their wonderful work to the journal. It was my pleasure to have read their wonderful study. This study clarified pelvic imbalance, spinal posture and scoliotic curve during two years of follow up, using Surface Topography Analysis.

I have some comments for major revision.

My specific comments on their work is noted below:

1. Does the author clarify the correlation among the parameter of coronal, sagittal, and transverse view?

Level of interest
Please indicate how interesting you found the manuscript:

An article of importance in its field

Quality of written English
Please indicate the quality of language in the manuscript:
